Highly efficient production without material waste

NEDSCHROEF

MACHINERY

Built to perform

Nedschroef Machinery delivers advanced cold forming solutions for the ammunition industry, specializing in cartridge cases and projectile cores produced directly from wire. Our machines combine multiple operations, reducing the need for additional processes or machinery. **Designed for high-volume production, our solutions create lasting production value.**

5 reasons why you
should produce
ammunition using
**our top-notch wire
forming machines**

5 bullet points

- Reduced material waste compared to production from strip
- High production output of up to 240 ppm possible
- Test before you invest
- Proven machine concept
- Specialized support and know-how located in Europe

Versatile production capabilities

Customer Centric Solution

Designed around **your needs**, ensuring the best fit for your operations, efficiency, and growth.

1. Customer request

2. Feasibility

3. Solution

4. Design

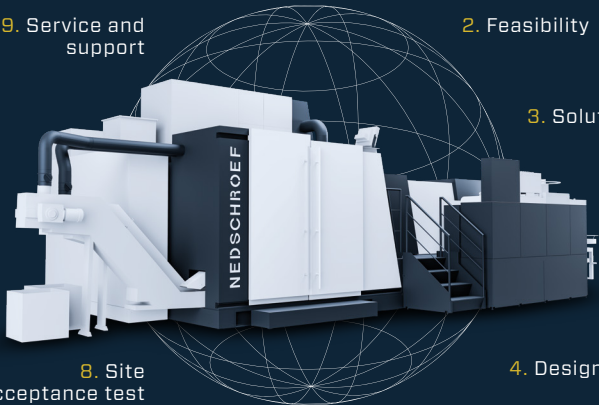

5. Execution

6. Factory
acceptance test

7. Training

8. Site
acceptance test

9. Service and
support

Co-engineering

Turn your idea into a production-ready solution with Nedschroef Machinery Co-Engineering. As an experienced machine builder, we combine your product know-how with our engineering expertise to develop custom machines **optimized for precision, power, and efficiency**. From feasibility checks to tooling design, sourcing, and sample validation, we work transparently - side by side - until your concept performs in production.

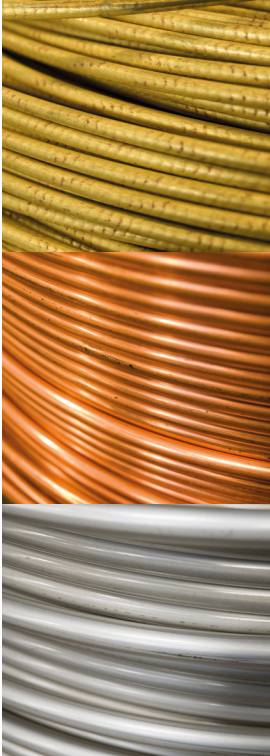

Ready to turn your idea into a production-ready solution?

Nedschroef Machinery

- Designed & built in Belgium
- Machine solutions adapted to your needs
- Project specific machine design
- Sample project-specific
- High-quality components for small-caliber ammunition, produced in a range of materials including brass, copper, steel and aluminium
- Co-engineering
- Training and academy
