

The Nedshear high-speed impact cutting machine produces blanks from coiled wire. The high-precision linear wire feeding system with servo direct drive makes this machine very accurate.

# Nedshear cutting machine

High-speed impact cutting

## Benefits

- Accurate cut-off length
- High shearing speed
- Fully automatic
- Length corrections possible during running

## Specifications

Wire diameter min - max	5 - 16 mm
Maximum cut-off length	120 mm
Minimum cut-off length	0,8 x wire diameter
Cut-off speed	10 m/s
Output	300 blanks/minute*
Cut-off length accuracy	0,02 mm (at all length settings)

\* depending on cut-off length
