

Straightening machine RRA straightens axially symmetric parts like long axles, shafts, bolts, screws and rods. Straightening improvement is up to factor 10. The machine is suitable for the following product shapes: with or without thread, with flange in the middle, with stepped shafts and with threaded ends.

# RRA straightening machine

High capacity and high performance

## Benefits

- High output
- Short set-up times
- Fault signalization: automatic rejection of defect parts
- Easy reproducibility of proven settings
- Compact design
- Operator friendly and easy maintenance

## Specifications

Maximum product diameter	3 straightening points: max. 22 mm
Minimum product diameter	6 mm
Product length	100 - 500 mm
Number of straightening points	min. 3 – max. 6
Straightening improvement	Up to factor 10
Maximum output	90 parts/min.
Floor space	1,5 m <sup>2</sup>
