

# Nedmax cold forming machine

High-speed production of large-diameter parts

Nedmax cold forming machine is suitable for the production of large-diameter metal parts from 28 to 36 mm and product lengths up to 400 mm. Unique features and technology assure high forming capabilities and maximum machine uptime. Efficient use of material – because of the integrated wire draw unit and end coil finishing - makes this machine very cost-efficient.

## Benefits

- High production speed
- Operator friendly because of full automation
- High productivity
- Easy maintenance
- Cost-efficient
- Product versatility, suitable for an extensive wide range of products

## Specifications

Machine type	NMX28S	NMX28M	NMX28L	NMX33M	NMX33L	NMX33EL	NMX36M	NMX36L	NMX36EL
Number of dies	4-5-6	4-5-6	4-5-6	4-5-6	4-5-6	4-5-6	4-5-6	4-5-6	4-5-6
Maximum wire diameter (mm) (at 600 N/mm <sup>2</sup> )	28	28	28	33	33	33	36	36	36
Maximum speed (parts/min.)	130	115	90	90	80	70	90	80	70
Maximum kick-out length (mm)	100	210	280	200	310	360	200	310	360

X = Number of dies
